Seating and signage on the coastal path near Whitehaven

Commissioned by the National Trust in 2009

Seating – Costal Path Whitehaven Cumbria

5 x bespoke steel & hardwood seats fitted into retaining stone walls.

As part of a 5 million pound land reclamation scheme, Scartworks worked in partnership with the National Trust and the landscape architects Entec to design 5 seating areas to compliment the post-industrial landscape. The seats were fabricated to fit within the curvatures of retaining walls which were built into the landscape.
